Healthcare

Education

# Chris Holdup

Tailoring client specific advice through a range of transport planning skills

Chris brings experience from transport and multi-disciplinary engineering consultancies, working with private and public sector clients across the South of England.

Ranging from local development schemes through to strategic mixed-use urban extensions, Chris is able to provide advice to a variety of clients, tailored to suit their individual needs and requirements.

Specialties include access opportunities and risk, engagement with local authority officers, masterplanning and highway design, transport assessments, statements and travel plans.

Outside of the office Chris likes to keep active and whenever the opportunity arises can be found on a mountain exercising his passion for skiing.
